

# Gallium & Germanium Restrictions

March 2026

In accordance with the latest Chinese Government Restrictions, which will impose export controls of the two Elements – Gallium and Germanium.

Invertek can confirm that we are performing our due diligence on our supply chain and are obtaining information from our suppliers on the potential impact that this may have on the production of Semiconductors.

The response we received back from all of our Suppliers was, like us, that they are monitoring the situation closely; However they do not expect any direct impact, and are putting processes in place to remain reliable in light of these restrictions. Invertek have taken steps to ensure communication throughout our Supply Chain and will continue to offer transparency in the case that new information arises.

We are happy to answer any further questions: [IDL.Procurement@shi-g.com](mailto:IDL.Procurement@shi-g.com)
