PPWR Readiness Statement - SPD018

Member of Sumitomo Drive Technologies

We are actively monitoring the implementation of the EU Packaging and Packaging Waste Regulation (PPWR) and are currently assessing the requirements applicable to our products, packaging, and business activities. We are working closely with our suppliers and internal stakeholders to establish and implement the processes necessary to support compliance within the applicable regulatory timelines.

As a number of key PPWR requirements remain subject to ongoing development at EU level, including delegated acts, implementing measures, harmonised standards, and further regulatory guidance, certain compliance data, technical information, and supporting documentation may only become available progressively over time.

Any information or statements provided at this stage are based on the regulatory requirements and guidance currently available and may be subject to revision as the legislative framework develops and additional clarification is published by the relevant authorities. We will continue to review emerging requirements and provide updates as further information and supporting documentation become available.

Please note that this statement is provided for information purposes only. It does not constitute a Declaration of Conformity, a Supplier Declaration pursuant to Article 39 of the PPWR, or the technical documentation referred to in Annex VII of the Regulation. Accordingly, it should not be interpreted as confirmation that any product, packaging, or packaging system has achieved full compliance with all applicable PPWR requirements.
