November 2018

Invertek to preview a new range of VFDs at SPS IPC Drives 2018

Invertek Drives Ltd is to preview a new range of outdoor and larger size variable frequency drives at SPS IPC Drives 2018 in Nuremberg, Germany (27-29 November 2018), the company has announced.

Specific details will be revealed at the show where the new VFDs will be previewed prior to launch. Invertek's stand will be at Hall 4, Stand 349.

SPS IPC Drives is a key exhibition for Invertek which will be among 20 UK companies exhibiting among 1,700 international businesses.

"We'll be previewing a number of new variants of our Optidrive™ VFDs. They are orientated towards opening up opportunities for applications where our innovative technology will benefit the end user with energy efficiency and cost savings," said Rhydian Welson, Sales and Marketing Director at Invertek Drives Ltd.

Invertek will have its range of Optidrive™ VFDs on display, along with its Optistick™ Smart Bluetooth and NFC rapid transfer communications device.

Last month Invertek launched the Optidrive™ Coolvert, one of the smallest VFDs in its class, providing OEMs with opportunities to reduce panel space and lower machine costs. The VFD has the widest ambient operating range of between -20°C to +60°C making it ideal for use in a wide range of environments.

Organisers of SPS IPC Drives say it will be the largest event to date, with an additional hall being used, taking the total floorspace to 135,000m².
